

MANAGING THE RISK OF LARGE PROJECTS

Keith Stratton
Stratton Consulting Inc.

Abstract

Management of Large Projects is extremely challenging and few large projects meet their performance targets for a variety of reasons. The panelists have wide backgrounds in project management (ranging from management, corporate organization, owner, review, oversight and litigation) in nuclear and non-nuclear applications. They will participate in a discussion of Managing the Risk of Large Projects fueled by a question and answer format. The intention is to have an open forum that will be entertaining, informative and useful. The session is expected to cover a broad range of project risk topics. The panelists will start the session by offering their perspectives of managing project risk as follows:

- Augusto Patmore, Partner KPMG LLP – Large energy independent project reviews – Cost estimating and management challenges
- Brett Plummer, VP Nuclear & CNO, NB Power - Utilities Risk perspective for Large Projects – Who controls what
- Fred Dermakar, COG President & CEO - Enhancing supplier performance through sharing of lessons learned
- Philip Helmes, President Helmes & Co LLC – Disputes and Forensic Perspective
- Sean Hagen, Senior Manager Sargent & Lundy Canada - Independent Project Oversight (IPO) - Guiding Principles
