

Augusto R. Patmore

*Partner KPMG LLP
C.Eng. MBA*

Augusto Patmore (KPMG Canada Partner) leads KPMG's Major Projects Advisory based in Toronto. He is a professional engineer (Civil with an MBA) and his experience includes a broad range of direct accountabilities (design and construction) and strategic consulting (energy, mining and infrastructure).

Since joining KPMG in early 2013, Augusto leads the KPMG Canada (East) Capital Projects Practice and focuses on servicing large international mining and energy clients around program/project strategy, delivery and project turnaround. He has carried out large multi-functional construction cost audits, and independent project reviews ("health-checks") in the Americas advising major mining, oil & gas and power & utility corporations around productivity and contractor performance. One of his major areas of focus has been advising nuclear industry clients around capital programs, project leadership, and strategy. This includes serving on the Refurbishment Construction Review Panel for the Darlington Nuclear Refurbishment Program and performing assessments of costing, project controls and procurement for various executive branches at OPG (Ontario Power Generation).

Prior to his current career as a partner for KPMG, he was a Project Manager and Project Director in the engineering and construction industry on large international infrastructure projects for 17 years. He has directly managed major P3 DBFO civil engineering contracts working for large international construction companies, including some of the largest highway privatizations in Canada and Ireland. He was the International Mining Division Director of a world class specialist mining contractor that focused its activity in mining and underground power plants working in 14 countries in Asia, Latin America and Europe. As a construction industry executive, he expanded a mid-size Spanish tunnel contractor to become a global player in its sector with the award of major international contracts such as a section of the Hong Kong MTR West Island Link.
