

**SNC • LAVALIN**

**Dezi Yang**  
**Senior Vice-President**  
**China Accounts**

Dr. Dezi Yang is Senior Vice President, China Accounts for Candu Energy Inc. / SNC-Lavalin Nuclear Inc. In this role, he works with the China Partners to develop CANDU new build opportunities in China and in the international market.

Dezi previously held the position of Senior Vice President, Engineering for Candu Energy Inc, where he led a team of over 700 engineers dedicated to the highest standards in CANDU technology.

Prior to joining Candu Energy Inc. in 2011, Mr. Yang held the position of Vice-President of Engineering in SNC-Lavalin Nuclear Inc.

Dezi began his engineering career over 30 years ago, and gained diverse experiences in academic, engineering and management. Dezi's academic background includes teaching and research. Dezi's engineering experience includes a strong background in engineering design and specification. He was a member of the team that won the 2004 Canada Consulting Engineer "Award of Excellence" for Category Transportation for his work on the Esplanade Riel – Winnipeg's landmark pedestrian bridge. His lengthy management history includes operation, project, engineering, and construction management responsibilities in China, Singapore and Canada.

Dezi is a registered Professional Engineer in Ontario and Manitoba. He is a member of the American Society of Civil Engineers (ASCE).

Dezi holds a doctorate and master's degree in structural engineering, as well as a bachelor of engineering in applied mechanics from Southwest Jiaotong University.
