

Paul Spekkens Biographical Notes

Paul Spekkens is currently Director, Nuclear Technology at Kinectrics Inc, and President of *Buckley Bay Technology Solutions Inc.*, a small technical consultancy. He retired from Ontario Power Generation/Ontario Hydro in 2016 after a 39-year career. Prior to his retirement, he was in the engineering support organization to the OPG/OH nuclear program for 20 years, most recently as Vice-president, Science and Technology Development. In this role, he was responsible for the management of all components and component engineering programs in OPG nuclear, including major component programs on fuel channels, feeders, steam generators and reactor components. Paul began his career with Ontario Hydro in 1977 in the Research Division, where he worked for 17 years on nuclear R&D in the areas of primary and secondary system chemistry, corrosion and cleaning. He holds a PhD in Chemistry from McMaster University in Hamilton.
